

# Vision Cyto<sup>®</sup> Assist

## Cytologist's workplace

# Organization and interpretation of cytological examinations

Workflow automation and standardization. Improved quality and increased productivity. Time efficiency.

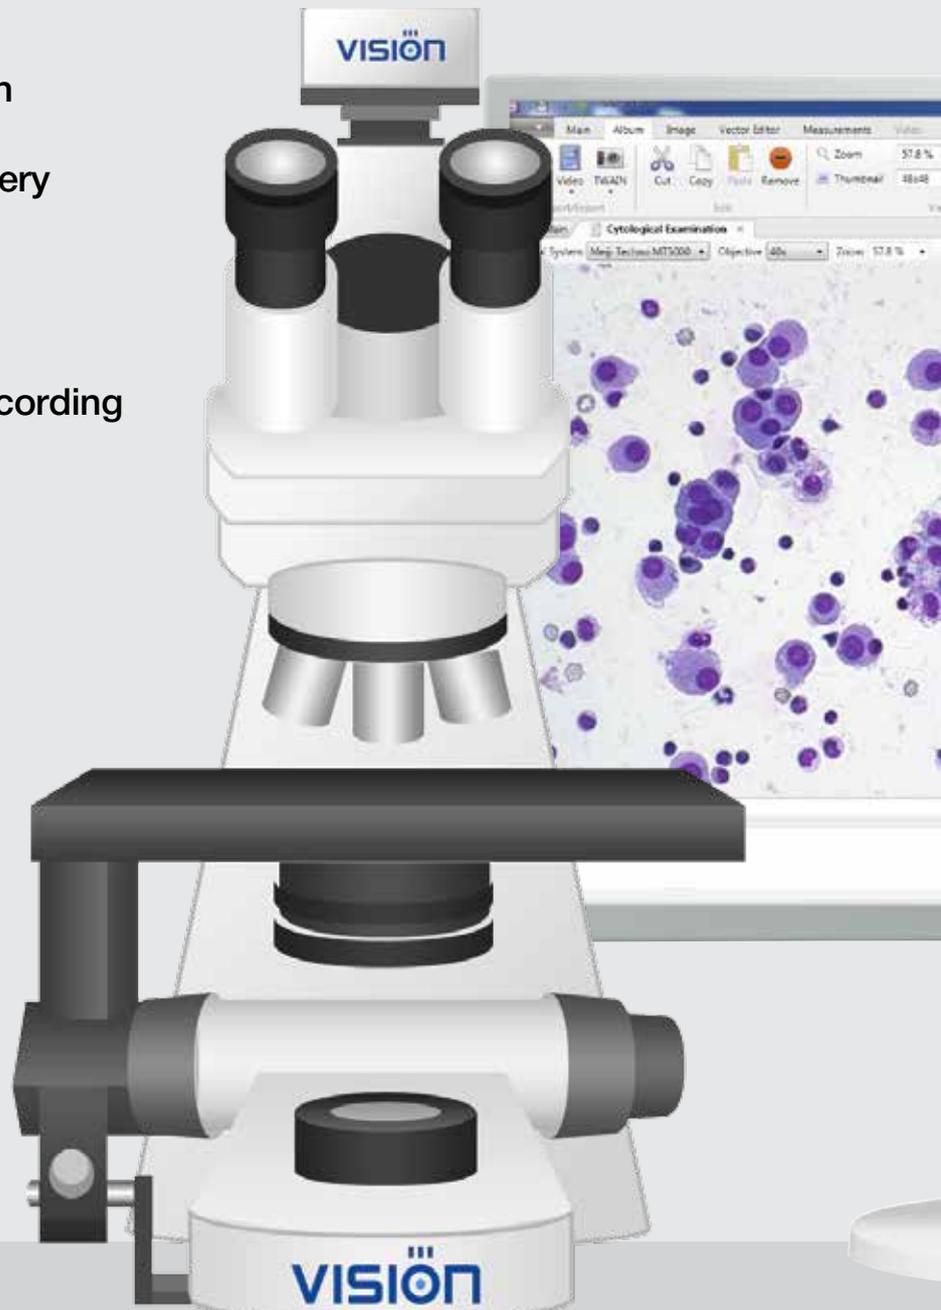

Automatic field of view selection

Creation of cytology sample gallery

Pre-set algorithm for cytology analysis

Validation of sample analysis according to pre-set algorithm

Pre-set cytological album for diagnosis reference

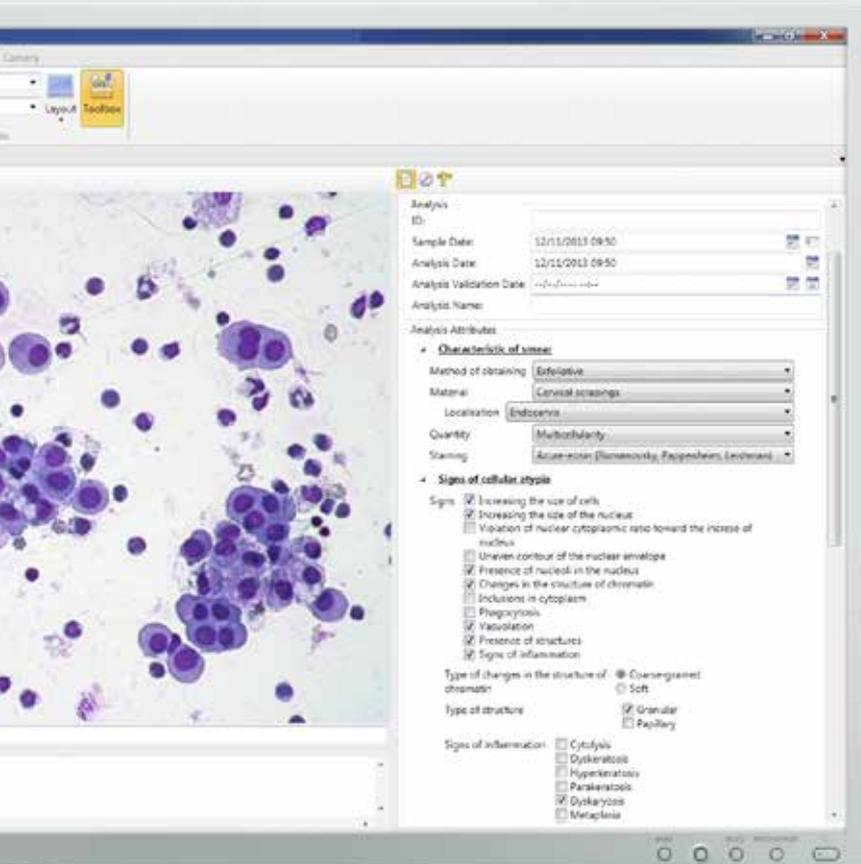

## A pre-set algorithm for cytology analysis

An irreplaceable assistant offers a standardized algorithm for the cytological examination. Raise the quality of cytological examinations to a new level.

Sample Attributes

- Characteristic of smear**
  - Method of obtaining: Exfoliative
  - Material: Cervical scrapings
  - Localisation: Endocervix
  - Quantity: Multicellularity
  - Staining: Azure-eosin (Romanovsky, Pappenhei)
- Signs of cellular atypia**
  - Signs
    - Increased size of cells
    - Increased size of the nucleus
    - Violation of nuclear cytoplasmic ratio toward the

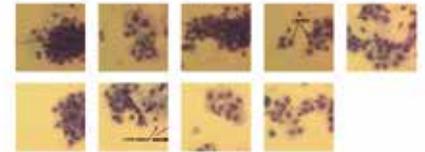

## Hints from the atlas

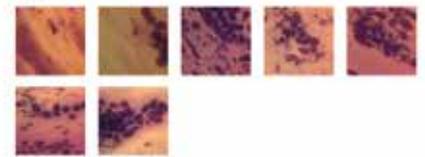

Develop your professional expertise by creating and maintaining an atlas. Add images with comments for later reference.

### Non-keratinizing squamous cell carcinoma

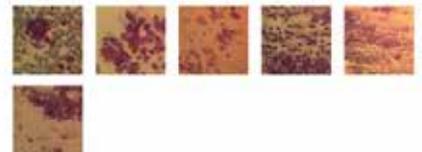

#### Pharyngeal swab

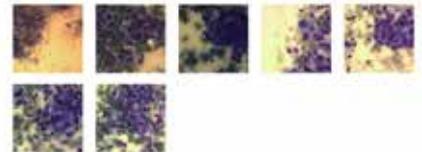

#### Vaginal smear

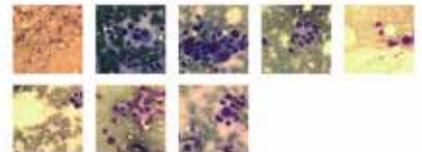

### Low differentiated carcinoma of lung

### Papillary thyroid carcinoma

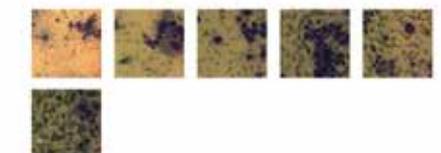

### Lobular carcinoma of breast

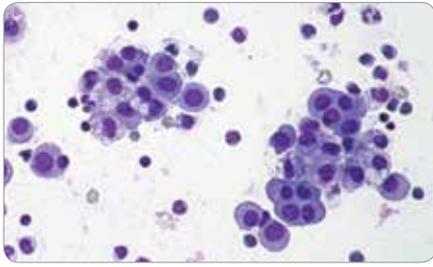

### Follicular carcinoma

### Follicular blastema, probably thyroid carcinoma

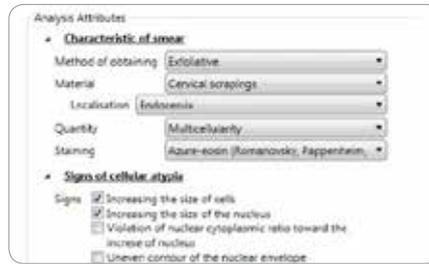

# Main characteristics

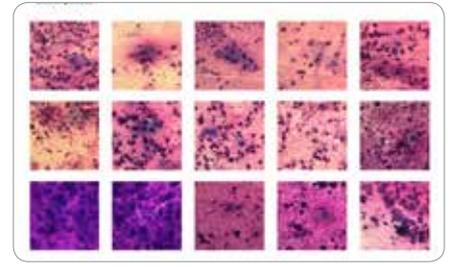

## Convenient organization and professional tools

Convenient work with digital samples. Find a required object on the cytology sample in video mode, and capture its perfectly crisp digital image.

## A pre-set algorithm for cytology analysis

An irreplaceable assistant offers a standardized algorithm for the cytological examination. Raise the quality of cytological examinations to a new level.

## Hints from the atlas

Develop your professional expertise by creating and maintaining an atlas. Add images with comments for later reference.

## Remote access and network capabilities

### Vision Cyto® Remote

Distant access to analysis results. Remote consultations and expert opinions. Remote supervision and monitoring. Remote validation of results.

### Vision Cyto® Network

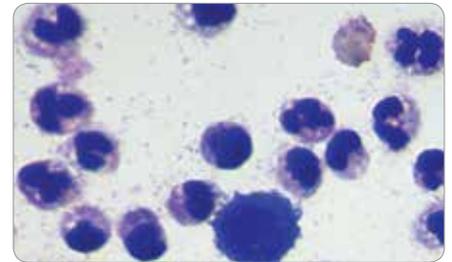

A single information environment.

## Laboratory Information System

### Vision Cyto® LIS

Possibility of bi-directional communication with LIS. Receiving tasks from LIS, automatic transfer of analysis parameters to LIS.

## Additional modules

### Vision Cyto® Body Fluids

Count and study of cells in human body fluids.

### Vision Sperm Sediment®

Cytologic analysis of sperm sediment for analysis of latent trichomoniasis, fungal, HPV infections, disbiosis and etc.
